2012 年课标卷 A 篇

Are you looking for some new and exciting places to take your kids (孩子) to? Try some of these places:

● Visit art museums. They offer a variety of activities to excite your kids' interest. Many offer workshops for making land-made pieces, traveling exhibits, book signings (签名) by children's favorite writers, and even musical performances and other arts.

● Head to a natural history museum. This is where kids can discover the past from dinosaur (恐龙) models to rock collections and pictures of stars in the sky. Also, ask what kind of workshops and educational programs are prepared for kids and any special events that are coming up.

● Go to a Youtheater. Look for one in your area offering plays for child and family visitors. Pre-show play shops are conducted by area artists and educators where kids can discover the secret about performing arts. Puppet (木偶) making and stage make-up are just a couple of the special offerings you might find.

● Try hands-on science. Visit one of the many hands-on science museums around the country. These science play-lands are great fun for kids and grown-ups alike. They'll keep your child mentally and physically active the whole day through while pushing buttons, experimenting, and building. When everyone is tired, enjoy a fun family science show, commonly found in these museums.

1. If a child is interested in the universe, he probably will visit_____.

A. a Youtheater

B. an art museum

C. a natural history museum

D. a hands-on science museum
